TAKAI PROTECT

HYGIENIZING SPRAY (250 ml): **9€**

RAZORS AND BLADES

- TWO IN ONE THINNING Razor
+ 10 blades
42€

Package of 10 Two in One blades: **10€**

- PLATINUM Razor
+ 10 blades
36€

Package of 10 Takai Platinum blades: **7€**

- PROSHAVE Razor
+ 24 blades
99€

Dispenser of 24 Proshave blades: **13€**

TAKAI TECHNOLOGY Guarantee

Takai scissors come with 2 free checkups/sharpening for unlimited time.

TAKAI TECHNOLOGY Glossary

VANADIUM

Increases blade rigidity and improves resistance to wear over time.

MOLYBDENUM

Reinforces anti-corrosion activity.

VG-10 COBALT

Super alloy that increases resistance and flexibility of the steel.

HIP PREMIUM STEEL (KARAKURI LINE)

Powdered or sintered steel obtained by HIP (Hot Isostatic Pressing) process. Selection of the best steels coated with nano-particles of powdered steel, compacted and then heat compressed at 1500 psi.

SUMMUM STEEL

Enriched alloy of vanadium, molybdenum, cobalt, chrome, tungsten and manganese. The perfect fusion for denser, smoother steel and extreme resistance over time.

HAMAGURI SHARPENING

Convex sharpening by a succession of 7 sharpening angles. The rounded side of the blade is perfect to the edge, so the cutting edge is an integral part of the blade for greater rigidity and durability.

DOUBLE HAMAGURI SHARPENING - MIRACLE SLIT

Available on the Summum and as an option on Karakuri blades. With straight cutting, the Miracle Slit lets you cut very thick strands as the micro-slits collect the hair. With thinning-sliding, the Miracle-Slit works like a Hamaguri model for a soft cut and efficient slicing. This double sharpening prolongs the blade life.

CONCAVE BLADES

Takai scissors have concave blades. They're curved on the inner side, resulting in perfect blade crossing and a softer cut because blade rubbing is reduced by 1 to 2 tenths of a millimeter. The hair doesn't slip. Finally, slicing techniques are efficient regardless of the blade opening.

TAKAI FELT OIL PEN

Takai felt pen: Just wipe it gently over the pivot point to ensure a perfect crossing of the blades.
